Project: Aether Smart Home Hub

Distribution: Public / Website

1. Frequently Asked Questions

Q: Who is Project Aether for? A: Aether is designed specifically for **Tech-Savvy Students** and DIY hobbyists looking for an affordable way to secure their dorms or first apartments. **[Trap #6: Audience Clash]**

- *Contradiction: Document 1 says the audience is "Professional Architects" for "Luxury Homes."*

Q: When can I buy it? A: Pre-orders will open in late 2026, with shipping confirmed for the holiday season (December 2026).

- *Contradiction: This date disagrees with both Doc 1 (October) and Doc 2 (January).*

Q: Is it expensive? A: No! We are committed to making privacy affordable. The Aether Hub will be **Free** for any student with a valid .edu email address.

- *Contradiction: Document 2 shows the manufacturing cost is very high ($25k for tooling), making a "free" giveaway logically impossible without a massive loss.*

Summary of the "Architect's" Experiment:

When your readers upload these to **Claude 4.6**, it should output a report like this:

1. **Budget Conflict:** Doc 1 ($50k) vs. Doc 2 ($80k).
2. **Timeline Conflict:** Doc 1 (Oct) vs. Doc 2 (Jan) vs. Doc 3 (Dec).
3. **Audience Conflict:** Doc 1 (Luxury Architects) vs. Doc 3 (Students).
